Email Click Object

Account Engagement emails can contain links to download files. Use email click resources to learn more about how your prospects interact with the email links. Learn more about email clicks in Salesforce Help.

Include the authentication header with every request. For information on how to authenticate, see Authentication.

Resource Name   OperationDescription

Email Clicks Query`GET`   Request information for the email clicks that matches the specified criteria.

Request information for email clicks that match the specified criteria. You can specify the email clicks and the fields to request. A maximum of 200 are returned.

Use these parameters to specify which email clicks are returned. Parameters can be used in any combination and in any order unless otherwise specified.

Notes:

Parameters must be URL-encoded.

Dates and times must use GNU Date Input Syntax (yyyy-mm-dd:hh:ss).

For a full listing of email clicks fields see Object Field References.
